

CS 338 Milestone 0: Project Preparation

Yuqi Gu (20884580), Tianchen Luo (20820256), Jessica Idahosa (20829267), Ming Yun Michelle Yan (20881811), Hanwen Zheng (20910136)

Application Description

The application will be based on the Crime Data in the city of Los Angeles from 2020 to Present. The administrators of the database system are the United States government officials and police. The intended users of the application are the public. The application will support a plethora of functionalities such as recognition of the type of crime, crime rates, police response times, the status of the crime investigation, whether the crime was gender or age-targeted, and whether arrests were made or not.

Platform Description

The application will be hosted on a local machine and will feature a web user interface for users to interact with.

Members

The following is a list of the group members working on this project:

- Yuqi Gu: Setting up GitHub repo, writing and uploading source code.
- Jessica Idahosa: Sourcing data set used for this project, improving progress report details.
- Tianchen Luo (Roy): Setting up GitHub repo, writing README.txt.
- Ming Yun Michelle Yan: Sourcing data set used for this project, preparing sample database.
- Hanwen Zheng: Sourcing data set used for this project, preparing sample database.

Each member of the team has contributed equal effort to the progress of this project so far. All members contributed to writing the report for Milestone 0.
